

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

PUBLIC LECTURE & STARGAZING

Ancient East Asian Astronomy

A lecture by Joo Heon Yoon
Friday, March 25th, 8:00PM
Pupin Hall, Columbia University

While it is true that the math and science taught in schools nowadays is based on ancient Greek, Egyptian, and Arab knowledge, ancient East Asian countries such as Korea and China also developed their own precise ideas and measurements which are relevant to modern math and science. Old East Asian astronomy will be discussed during this talk.

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. For directions, weather updates and more information, please visit:
