

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

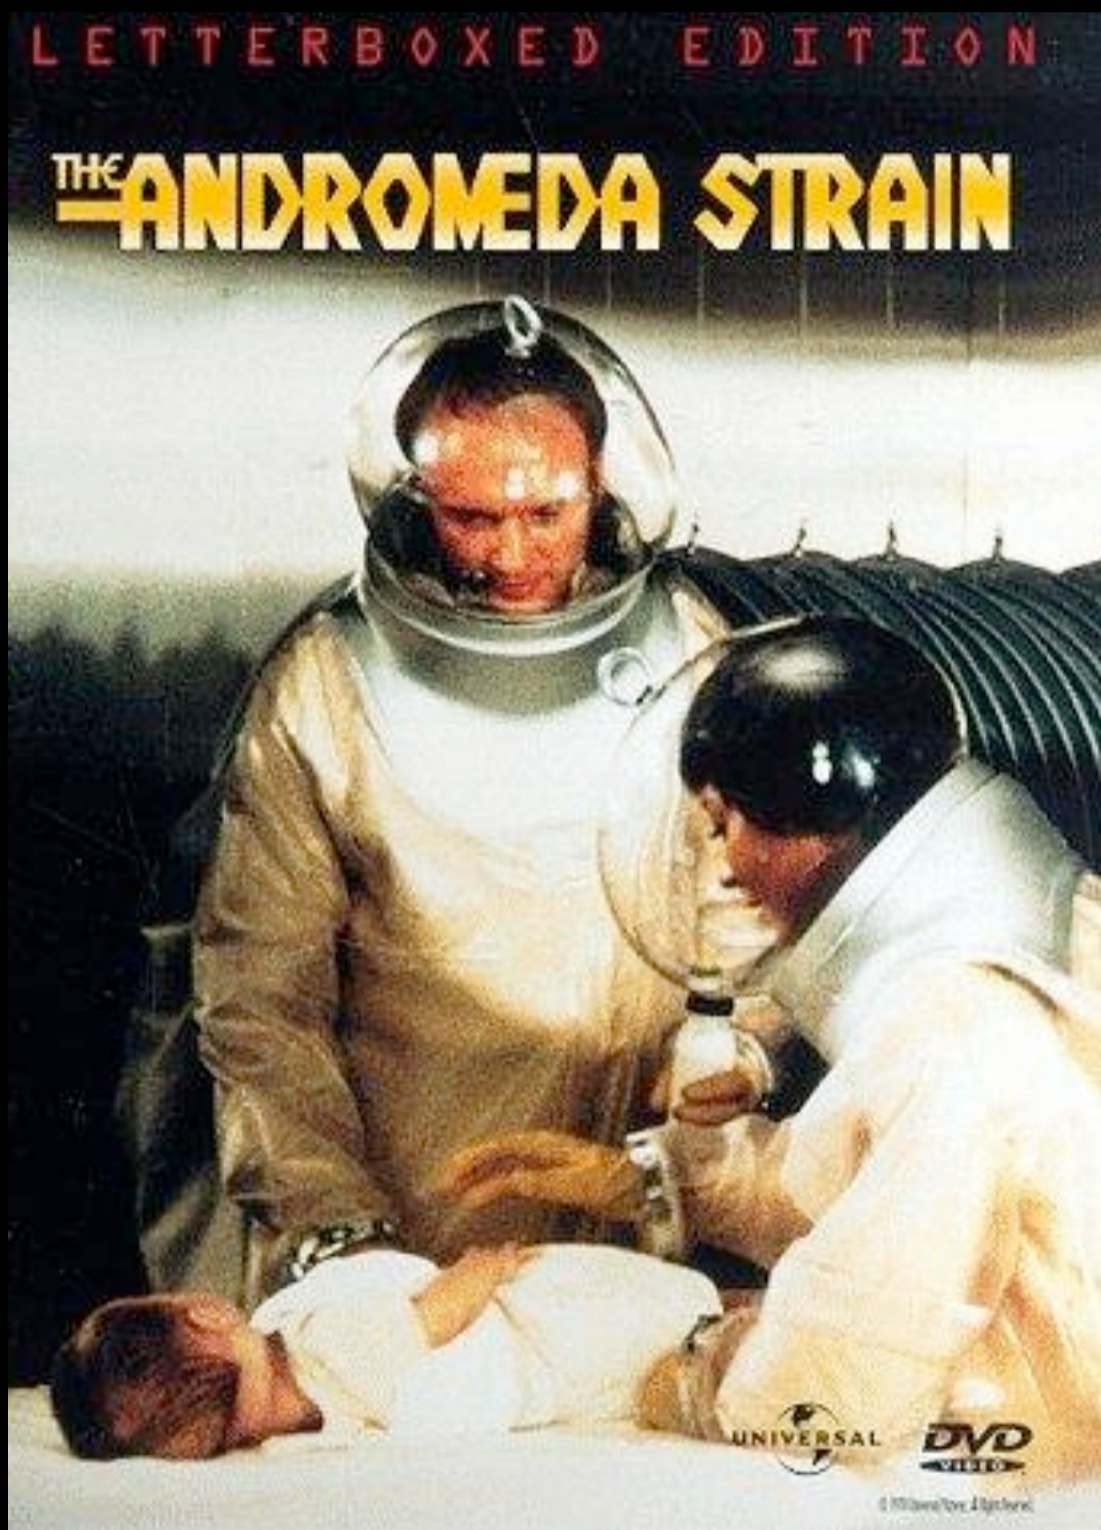

STARGAZING, FILM & LECTURE SERIES

The Andromeda Strain

Friday, July 8, 7:00PM

Pupin Hall, Columbia University

Film,
Discussion
and Stargazing

A science-fiction classic by acclaimed author Michael Crichton, this film investigates a potential scenario for our first contact with an alien species: microorganisms. This movie remains as relevant today as it was 40 years ago.

Films are shown in their entirety, followed by a short lecture and discussion on the relevant science by astronomers. If weather permits, guided telescope observing occurs after the film.

All events are free and welcome to all members of the public. No reservations are needed.

For directions, weather updates and more information, please visit:
