

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING & LECTURE SERIES

Is Our Universe Alone in the Multiverse?

A Lecture by David Kagan
Friday, December 2nd, 7:00PM
Pupin Hall, Columbia University

Are there other Universes? What could that even mean? While entirely speculative, many theorists believe that the idea of multiple Universes is a serious implication of some of our deepest theories of Nature. In this talk, I will explain the multiple meanings of this term and sort out definite fiction from possible fact.

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes.
