

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING, FILM & LECTURE SERIES

Primer

Friday, July 27th, 7:00PM
Pupin Hall, Columbia University

At night and on weekends, four men in a suburban garage have built a cottage industry of error-checking devices. But they know that there is something bigger and more innovative out there waiting for them. That something is their new invention, which appears to be able to distort time.

Films are introduced, shown, and later discussed by scientists, separating science fact from fiction.

Lectures are 30 minutes and at a public level. No reservations are needed.

Films and lectures are followed by guided stargazing with telescopes (weather permitting).

All events are free, open to all members of the public, and held at Columbia University.
