

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING & LECTURE SERIES

Living with the Stars

A lecture by Helena Uthas
Friday, November 16th, 7:00PM
Pupin Hall, Columbia University

Say the word "astronomer" and most people think of an old man, shivering in the cold, dark night, hunched over the eyepiece of a telescope. Today, there are few who are lucky enough to even have looked through an eyepiece. However, being an astronomer still offers the possibility to travel the world and visit observatories in exotic places. This talk tells the story of the life of an support astronomer. What happens when you get the chance to spend a few years away from civilization, with only the dark night and stars as company?

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want.
