

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING & LECTURE SERIES

Life, the Universe, and Everything

A panel discussion

Friday, December 14th, 7:00PM

Pupin Hall, Columbia University

Why is the sky blue? How do stars form? Why do we think the universe is expanding? Bring questions and enthusiasm and join us for an unscripted, interactive panel discussion about anything from the origin of life to the expansion of the universe, driven by questions from the audience!

Panelists: Lia Corales, astronomy graduate student (Columbia), Hassan Saktah, biology graduate student (Columbia), and Adrian Price-Whelan, astronomy graduate student (Columbia). The panel will be moderated by Dr. Demitri Muna, astronomy research scientist (NYU).

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting).

All events are held at Pupin Hall at Columbia University. No reservations are needed.

Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want.
