

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

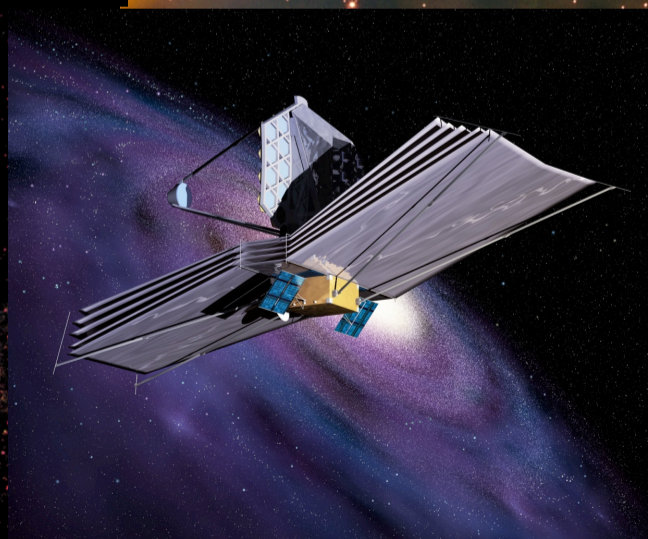

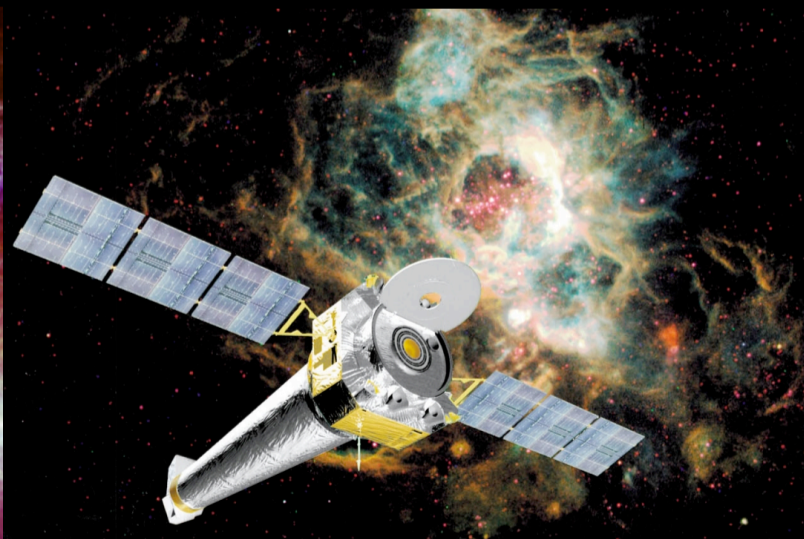

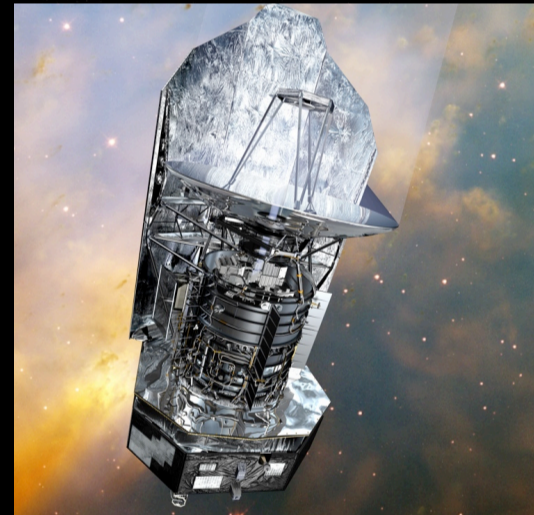

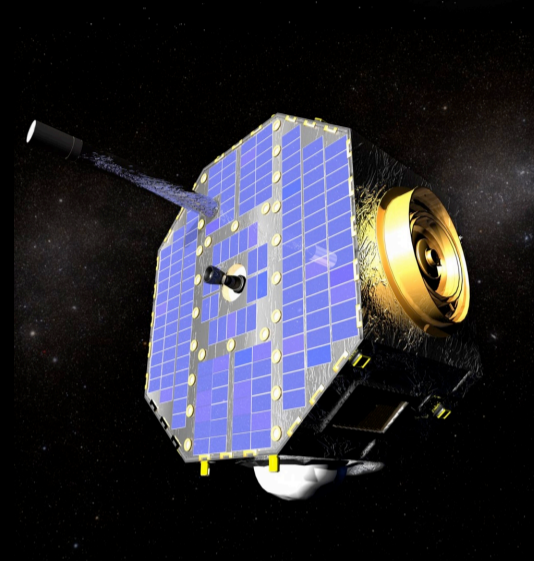

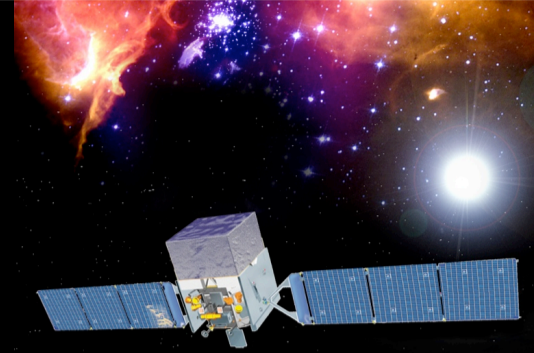

STARGAZING & LECTURE SERIES

Eyes in the Sky

by Ximena Fernandez
Friday, April 5th, 8:00PM
Pupin Hall, Columbia University

There are tens of telescopes in space constantly observing the most exciting events in the Universe. In this talk, I will highlight some recent results from the different space telescopes, ranging from gamma rays and X-rays coming from the energetic center of our Milky Way, to infrared light from galaxies in the young Universe.

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want. For directions, weather updates and more information, please visit:
