

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING & LECTURE SERIES

How Big is the Solar System?

by Brian Levine

Friday, October 11th, 8:00PM

Pupin Hall, Columbia University

New York City is a big place, and if you've ever flown over it, you might have a sense of that size. The Earth is much bigger, and few people can really grasp how big. But the Solar System is so much bigger! Join us as we explore the size of our celestial neighbors and neighborhood!

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want. For directions, weather updates and more information, please visit:
