

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

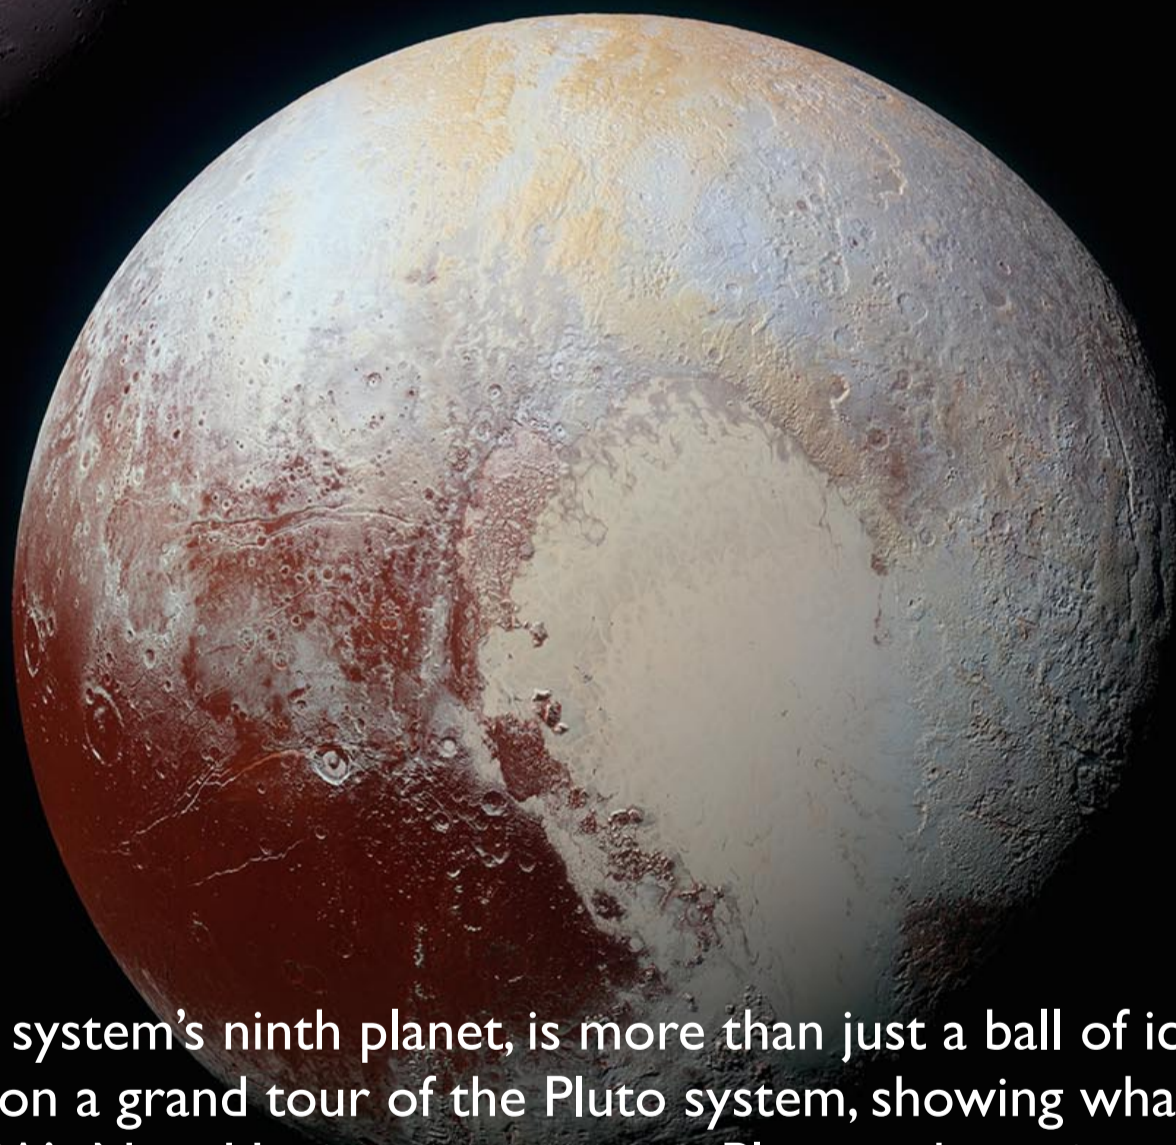

STARGAZING & LECTURE SERIES

New Horizons: Understanding Pluto

Briley Lewis

Friday, April 20th, 8:00PM

Pupin Hall, Columbia University

Pluto, formerly the solar system's ninth planet, is more than just a ball of ice. In this talk, we'll set out on a grand tour of the Pluto system, showing what we've learned from NASA's New Horizons mission to Pluto and proving that it is an interesting object whether or not we call it a "planet."

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting).

All events are held at Pupin Hall at Columbia University. No reservations are needed.

Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want.
