

COLUMBIA ASTRONOMY OUTREACH PRESENTS:

STARGAZING & LECTURE SERIES

Size Isn't Everything (For Telescopes)

Moiya McTier

Friday, December 14th, 7:00PM
Pupin Hall, Columbia University

Large telescope facilities cost billions in both time and money to construct and maintain, so why do we have so many of them? In this talk, I'll tell you what it is about different telescopes that make them better or worse suited for different areas of research.

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at Pupin Hall at Columbia University. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want.
